Claim Rejections - 35 USC § 112

Claim 38 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The guide roller movement in an axial direction is not adequately disclosed.

Claims 1-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are replete with errors too numerous to list individually. Examples are: claim 1- No antecedent basis for "said bottom elongated member"; "rotors or winders" is indefinite; "wind or engage" is indefinite; claim 2, "criss-crosses onto the second member (no antecedent basis) in the form of a drum" is vague and indefinite. "criss-crosses" not understood and it is not known what is "in the form of a drum", the criss-crossing line or the second member. Again, these are merely a few of the errors. The claims must be corrected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3634

Claims 1,2,4 and 11-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Toti '192.

In Figs. 50-52, see primary lines 16,17, primary rotors 19, secondary line 178, rotary members 176,178, and spring 26A,31A,41A. The term "criss-crosses" is met as best understood.

Claims 23-28,31,32,36,37 and 39-45 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gertzson.

See upper support 10, primary rotors 34,35, secondary line 17, "means" 14,16,21,22,23, rotary member 14. Spring 16 imparts tension to the cord.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-22 and 40-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gertzson in view of Kuhar '100.

Gertzson is relied upon as discussed above. Kuhar discloses a well known spring motor to wind the cords and to keep the shade in a desired position. It would have been obvious to provide Gertzson with such a counterbalance system so as to maintain the shade in the desired position.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-49 are rejected under the judicially created doctrine of double patenting over the claims of U. S. Patent No. 6,837,294 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: for example, claim 1 of the patent.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
